Summer Term- Over and Under Ground
Where do animals live?

Please remember to practice phonics sounds and tricky words as often as you can. This will really support your children to become confident readers.

We are looking at animals and their habitats in Science. Can you choose an animal, research some facts and create a fact file? It could include what they eat, where they live in the world, how many legs they have.

Can you go on a mini beast hunt around your garden? Write a list of all the mini beasts you find. Can you then compare them- how many had 6 legs? How many had longer legs?

Here is a good website to give you some ideas to find some exciting mini beats-

<https://www.woodlandtrust.org.uk/blog/2023/05/minibeast-hunt/>

In History, we are going to find out some information about the history of Tasburgh! Please visit the village sign (the Upper Tasburgh sign is a bit safer to look at!) Once you have visited it, can you create your own picture of it?

In Geography we are learning our continents and seas. Here is a catchy song to help you remember the continents of the world-

For any completed activities, please take photos and put on Tapestry. We are looking forward to seeing what you do! We will also have an opportunity to share these as a class. We will let you know a date for these to be brought into school. Please do not bring them into school until a message has been sent out.
